CHICAGO

“Chicago” plays an important role in maintaining the Port of Hamburg’s water depth. The workboat pulls sediments into areas where they are picked up by suction dredgers. At the Hitzler shipyard, the vessel was fitted with the COBRA system for emissions-free operation.

Type of vessel	Port Authority workboat
Battery system	COBRA, water-cooled
Battery capacity	423 kWh
Application	Diesel-battery hybrid
Shipyard	Hitzler Werft
Owner	Flotte Hamburg
Dimensions	Length 18.0 m, breadth 8.3 m

Battery System

COBRA
