## COASTAL LIBERTY

Battery System

Capacity

280 kWh

Customer

The offshore supply vessel operates in a delicate intertidal zone in the North Sea. The hydrogen power generator on board provides emissions-free propulsion energy during operations in the Wadden Sea National Park and incorporates a COBRA energy storage system.

Type of vessel	Offshore supply vessel
Battery system	COBRA, air-cooled
Battery capacity	280 kWh
Application	Diesel-hydrogen-electric
Shipyard	Tumen
System integrator	eCap Marine
Dimensions	Length 42.8 m, breadth 9.0 m
